

## Be seen with our automated craigslist posting tool

We optimize your craigslist listings to maximize sales. No other craigslist solution integrates with your inventory like ours — giving you the power of real-time monitoring and listing management. With Inventory+ managed craigslist solution you'll get the best feature functionality, the best integration and the best value.

**Best Feature Functionality:** Our managed craigslist solution dials-in your listings to help you sell more vehicles and maximize your return on investment.

- Take advantage of advanced filters that allow us to dial-in your listings by; frequency of post, time of day, day of week, price, make/model, mileage, days on lot, certified, or number of photos. And, we can vary your postings by region if you are a multi-region dealer or vary what is posted where if you post in various cities.
- Leverage Title Builder to help draw special attention to your ads and make them unique.
- Add special custom advertising messages in with your photos to help promote services or positioning.
- Utilize a custom image frame and watermark to help build your brand.
- Customize calls-to-action throughout your listings to increase response.
- Gain integrated posting through a trusted Craigslist API with no ghosting or flagged ads.
- Access reports on sold units to identify opportunities for listing new vehicles.
- Track results with a free toll-free number.
- List on backpage.com at no additional cost.
